

### Summary

---

I wish to prove myself in joining a talented team to grow my skills as a developer. After a successful adventure exploring the other side of the technical medal and beyond a bachelor in Information Systems, I have also completed the Computer Science and Web Programming certificates from Harvard. I am now eager for an entry level position as a software developer.

### Skills

**Main Languages:** Python, JavaScript, HTML/CSS, knowledge of Java and C

**Frameworks:** Django, Flask, ReactJS, Bootstrap

**Database:** SQL (PostgreSQL, SQLite)

**Other:** Git, Linux, Cloud infrastructure (Heroku), MVC design pattern

**Languages:** English, French and Romanian

### Education and Certifications

---

**CS50's Web Programming with Python and JavaScript - [HarvardX](#)** **Nov 2021**

**CS50x: CS50's Introduction to Computer Science - [HarvardX](#)** **June 2021**

**Bachelor of Commerce; Information Systems Major, Computer Science Minor** **Dec 2017**  
McGill University - Montreal

### Projects

---

All projects are full stack applications built with Python (Django) and PostgreSQL on the server side, JavaScript, HTML/CSS, Bootstrap on the front-end, structured with MVC and stored on the Heroku cloud platform.

#### **Project Tracking App (Workboard)**

- This is a project tracking application where users can create a board for each project. Group of activities can be tracked by creating columns and each activity can be created through cards. The cards can be moved between columns. Everything in the board can be edited or deleted.

#### **Social Networking App**

- This is an implementation of a social media platform where users can create posts, give and receive likes, and have their own followers.

#### **E-commerce App**

- This is an auction platform where users can create postings and have other users bet on them. The winning user gets notified when the auction closes. A watchlist and comment section is also implemented.

#### **Email App**

- This project is an email client where users can send, receive, reply and archive emails. Everything is done in one responsive page through JavaScript.

## Professional Experience

---

### IT Recruiter

**Apr 2020 - Present**

LRO Staffing, Montreal

- Provided full lifecycle recruitment from sourcing and screening candidates, discussed technical projects, and coordinated the interview process
- Automated the sourcing of specific profiles with LinkedIn Recruiter
- Helped colleagues understand the nuances between technical roles and tools

### IT Recruiter

**Oct 2018 - Mar 2020**

Randstad Technologies, Montreal

[Responsibilities max 5 points]

- Mentored colleagues on boolean searches and helped to automate certain processes in the Application Tracking System to improve workflow
- Communicated with the development team regarding new feature and bugs related to the in house ATS
- Provided full lifecycle technical recruitment and coordinated work with team to meet deadlines

### IT Recruiter

**Apr 2018 - Oct 2018**

Intudio, Montreal

- Managed the entire lifecycle of the technical recruitment and developed action plans to deliver on time
